

ANDRÉS ALVAREZ

UX/UI DESIGNER · GAME UX · INTERACTIVE DESIGN

Mexico City, Mexico · andresalvarezarellano@gmail.com · +52 (55) 1678 9225 · [LinkedIn](#) · [Portfolio](#)

PROFILE

Multidisciplinary UX/UI and Game UX Designer with a B.A. in Interactive Design, a Game Design diploma from Vancouver Film School, and 2+ years of professional software QA experience. I design clear, responsive web, mobile and game experiences by combining user-centered design, playtesting, implementation awareness and systems thinking.

EXPERIENCE

UX/UI Designer | Doggo Game Studio — Yoolmi | 2026–Present | Mexico / Remote

- Design and refine onboarding, authentication, home, lesson, feedback and results flows in Figma for a child-focused Mexican Sign Language learning app.
- Collaborate with programmers, artists and the client in weekly Agile reviews, focusing on navigation, hierarchy, clarity, consistency and implementation constraints.

Software Test Engineer | Lionbridge Games | Jun 2024–Aug 2025 | Mexico City

- Evaluated complex AAA/live-service products across PC, PlayStation, Xbox, Android and iOS; documented 300+ functional, interaction and usability issues with clear reproduction and technical evidence.
- Coordinated 30+ testers, supported triage and regression planning, created Jira/JQL filters and reusable QA documentation, and communicated directly with international clients in English.
- Promoted through Test Associate (May–Sep 2023) and Senior Tester (Sep 2023–Jun 2024) before moving into Software Test Engineer responsibilities.

SELECTED PROJECTS

Project Manager · Game Designer · UX/UI Designer | Lobster Loader — Vancouver Film School | 2025–2026

- Led a 6-person multidisciplinary team through a 6-month cycle (2 months pre-production, 4 months production) across M1, M2, M3, Alpha and Beta/Pitch & Play milestones.
- Used 103 playtest responses across five milestone forms to simplify 3D rotation controls, evolve onboarding from one-time instruction to contextual reminders, and strengthen scoring feedback and readability.
- Designed systems around three pillars — Forward Motion, Small Number Gets Bigger and Flexibility — including a layer-completion bonus that supported both casual spatial play and deeper score optimization.

UX/UI Designer · Front-End Developer | Xapontic — Universidad Iberoamericana | 2020

- Designed a responsive e-commerce experience from scratch using card sorting, information architecture, wireframes, interactive prototypes, usability testing and responsive layouts.
- Implemented the customer-facing front end in HTML, CSS and JavaScript; the project received a Mención Honorífica at Diseña México 2020 in the student Websites category.

EDUCATION

Vancouver Film School | Diploma, Game Design | 2025–2026

Universidad Iberoamericana | B.A., Interactive Design | 2018–2023

SKILLS

UX/UI: Figma · Adobe XD · Information Architecture · User Flows · Wireframing · Prototyping · Responsive Design · Usability Testing · Design Systems · Accessibility

Game UX & Interactive: Game UI · Onboarding · Playtesting · Game Feel · Information Hierarchy · Unity · Unreal Engine · C#

Technical & Visual: HTML · CSS · JavaScript · Jira/JQL · TestRail · Git · Photoshop · Illustrator · Maya · Substance Painter

Languages: Spanish — Native · English — Professional / C1
